ROQUE DAVE SISDUERO

12+ Years Driving Data-Driven Decision Making through Analytics, Business Intelligence & Performance Reporting

roquedave0902@gmail.com | 0547402444 | www.linkedin.com/in/RoqueDave

EXECUTIVE PROFILE

Experienced in delivering data-driven insights, KPI frameworks, and executive dashboards that enhance operational efficiency and strategic decision-making. Proven expertise in data governance, performance optimization, and translating complex datasets into actionable intelligence for senior stakeholders across government entities.

CORE EXPERTISE

- **Performance Management & KPI Reporting |** KPI Frameworks, Power BI Dashboards, Executive Reporting
- **Data Analytics & Business Intelligence |** DAX, SQL, Advanced Excel
- **Reporting Automation & Data Visualization |** Power Query, Power BI
- **Data Governance & Data Quality |** Data Validation, Data Modelling, Azure Databricks
- **Business & Systems Analysis |** CAFM, ERP Systems, Process Improvement

WORK EXPERIENCE

Lead – Performance Analytics & Data Governance
Department of Government Enablement | Abu Dhabi, UAE
Feb 2023 – May 2026

- Architected enterprise-level reporting and KPI frameworks across the full jobseeker lifecycle (vacancies, nominations, interviews, offers, placements, and sustainment) in collaboration with leadership, translating strategic workforce objectives into measurable performance indicators, standardizing 90+ enterprise KPIs across seven business units, and delivering weekly executive reporting through a trusted single source of truth to enable timely data-driven decision-making.
- Directed interim data governance during the decommissioning of the enterprise Jobseeker Management System and transition to a new AI-driven platform, ensuring reporting continuity, improved data quality controls, and structured data capture processes; supported migration and validation of ~20K legacy records.
- Led end-to-end data gap analysis for an enterprise Jobseeker Management System, improving data completeness, accuracy, and lifecycle tracking from ~65% to 95%, enabling reliable lifecycle analytics and executive reporting.
- Designed and implemented semantic data models, Power BI dashboards, and KPI scorecards, reducing manual reporting effort by 70%, and enabling leadership with faster, data-driven decision-making.
- Built an end-to-end performance analytics framework for Job Placement Centers (Mawaheb), validating conversion rates across vacancies, nominations, interviews, offers, and placements to identify pipeline bottlenecks, improve workforce performance monitoring, and enhance executive visibility.
- Led enterprise data governance and data quality initiatives, performing structured gap analysis, A/B testing, and system optimization that improved KPI integrity, standardized reporting, and reduced reliance on manual datasets.
- Delivered advanced labour market and policy analytics, including root cause analysis of unemployment in Abu Dhabi, long-term unemployment constraints, and evaluation of part-time employment policy impact, analyzing data from over 6,500 jobseekers to support evidence-based workforce planning and strategic policy decisions.

Senior Data Analyst & Data Governance Specialist
Department of Education and Knowledge | Abu Dhabi, UAE
Aug 2017 – Feb 2023

- Built centralized nursery and early childhood education databases from scratch by translating, validating, and consolidating fragmented Arabic records into standardized English master datasets covering nurseries, students, staff, and inspection results, establishing a reliable data foundation that improved reporting consistency, data quality, and executive decision-making.
- Architected interactive Power BI dashboards and forecasting models covering nursery operations, student demographics, enrolment trends, retention analysis, and inspection performance across 230+ nurseries, leveraging 28,000+ student records to generate predictive insights supporting demand forecasting, resource planning, and executive decision-making.
- Designed and implemented enterprise KPI frameworks aligned with education sector objectives, developing executive performance metrics across licensing, student, staffing, and provider datasets. Applied advanced analytics, trend analysis, and performance model evaluating sector growth, capacity utilization, supply and demand dynamics, provider performance, and compliance outcomes, enabling leadership to make data-driven decisions for strategic planning and operational improvement.
- Established data quality and governance frameworks across education datasets, implementing validation, enrichment, and stakeholder verification processes to improve data accuracy, completeness, and consistency, ensuring trusted KPI reporting and performance analytics.
- Supported enterprise system implementations (eSIS and PASS) by leading data migration, validation rules, and process alignment with developers to ensure seamless system integration and reporting continuity.

Technical Controller
Telecommunications Regulatory Authority (TRA) | Dubai, UAE
Jul 2016 – July 2017

- Managed project and asset lifecycle activities through CAFM and enterprise systems, ensuring accurate tracking, maintenance planning, performance monitoring, and data integrity across multiple facilities.
- Coordinated preventive and corrective maintenance projects for critical infrastructure, overseeing vendors, service delivery, procurement coordination, and compliance with project timelines.
- Supported project administration activities, including work order management, contract documentation, invoice verification, and project close-out processes, with working knowledge of SAP project and procurement workflows.
- Prepared analytical reports, dashboards, and project performance updates to support planning, decision-making, and operational efficiency.
- Collaborated with internal stakeholders, contractors, and suppliers to resolve project issues, facilitate contract administration, and ensure successful project execution.

Drilling Data Analyst
Thonhauser Data Engineering | Dubai, UAE
Aug 2014 – Feb 2016

- Managed structured and real-time streaming drilling data, ensuring accurate capture, validation, and integration into performance monitoring systems.
- Performed data quality control by identifying inconsistencies and coordinating with vendors to resolve data gaps and integrity issues.
- Analyzed drilling performance using proNova analytics tools to track operational KPIs and efficiency indicators.
- Delivered daily rig performance reports to clients via the proNova web portal, supporting operational optimization and data-driven decision-making.

Planning & Data Analyst
Dubai Airports | Dubai, UAE
Aug 2013 – July 2014

- Delivered advanced operational analytics for airport security and immigration performance, improving visibility of processing time, throughput capacity, staffing efficiency, and operational bottlenecks to support real-time decision-making.
- Analyzed passenger movement patterns across terminals using multi-source sensor data (immigration desks, E-gates, and security checkpoints), identifying congestion trends and operational variances to enhance flow optimization.
- Designed and implemented structured data transformation models in Excel to convert high-volume raw operational datasets into clean, governance-aligned analytical outputs, improving reporting reliability and transparency.
- Developed forecasting and performance reporting frameworks supporting workforce planning and capacity management, including monthly passenger and flight forecasts, daily shift performance, and peak-hour traffic analysis.
- Delivered trend, variance, and plan accuracy analysis (planned vs. actual performance), improving operational forecasting accuracy and enabling better resource allocation decisions.
- Provided actionable insights to airport leadership that improved passenger flow efficiency, optimized staffing allocation, and enhanced overall service level performance across key operational areas.

Technical Support Supervisor
SPi Global, Philippines
May 2009 – Jul 2013

EDUCATION

Bachelor of Science in Computer Engineering
Negros Oriental State University
2009

CERTIFICATIONS

- Google AI Professional Certificate – Google / Coursera | 2026
- IBM Data Analyst Professional Certificate – IBM / Coursera | 2022
- Data Integration, Data Storage, & Data Migration – SkillUp / Coursera | 2026
- Excel Skills for Data Analytics and Visualization (Specialization) – Macquarie University / Coursera | 2021
- Excel Power Tools for Data Analytics (Certificate) – Macquarie University / Coursera | 2021

LANGUAGE PROFICIENCY

- English: Fluent (Speaking, Reading, Writing)
- Filipino (Tagalog): Native Proficiency

ADDRESS

- Dubai, United Arab Emirates
